## Datasheet for ABIN3303404 Human OR4P4 cDNA Clone in Mammalian Expression Vector

#### Overview

| Quantity:    | 10 µg                       |
|--------------|-----------------------------|
| Gene:        | OR4P4                       |
| Species:     | Human                       |
| Insert:      | cDNA                        |
| Vector:      | Mammalian Expression Vector |
| Application: | Protein Expression (PExp)   |

#### Product Details

| Purpose:              | Untagged full-length cDNA clone from Human OR4P4 is ideal for over-expression of native protein for functional studies.  |
|-----------------------|--|
| Brand:                | TrueClones®  |
| Vector Backbone:      | pCMV6-Entry  |
| Promoter:             | Enhanced CMV Promoter  |
| Selectable Marker:    | Neomycin   |
| Bacterial Resistance: | Kanamycin  |
| Expression Type:      | Transient  |
| Specificity:          | With the native stop codon at the end of the ORF the C-terminal Myc-DDK tag in the vector won't be expressed.  |
| Characteristics:      | <ul> <li>These cDNA clones are isolated from full-length cDNA libraries and usually contain the coding sequence as well as the untranslated regions (UTRs) of the mRNA transcript appropriate to the library from which they were isolated.</li> <li>These cDNA clones are ideal for over-expression of native proteins for functional studies. Provided as 10 µg transfection-ready plasmids.</li> <li>Every lot of primer is tested to provide clean sequencing of cDNA clones.</li> </ul> |

#### Product Details

| Purification:      | The DNAs were purified using PowerPrep HP Plasmid isolation kits for transfection ready plasmids.   |
|--------------------|---|
| Sequencing Primer: | VP1.5 (forward) 5'GGACTTTCCAAAATGTCG 3', XL39 (reverse) 5'ATTAGGACAAGGCTGGTGGG<br>3'  |
| Components:        | <ul> <li>The cDNA clone is shipped in a 2-D bar-coded Matrix tube as dried plasmid DNA.</li> <li>The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.</li> </ul> |

### Target Details

| Gene:               | OR4P4  |
|---------------------|--|
| Alternative Name:   | OR4P4 (OR4P4 Products)   |
| Background:         | Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response     |
|                     | that triggers the perception of a smell. The olfactory receptor proteins are members of a large      |
|                     | family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory        |
|                     | receptors share a 7-transmembrane domain structure with many neurotransmitter and                    |
|                     | hormone receptors and are responsible for the recognition and G protein-mediated                     |
|                     | transduction of odorant signals. The olfactory receptor gene family is the largest in the            |
|                     | genome. The nomenclature assigned to the olfactory receptor genes and proteins for this              |
|                     | organism is independent of other organisms. [provided by RefSeq, Jul 2008].                          |
| NCBI Accession:     | NM_001004124, NP_001004124   |
| Application Details |  |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Storage:            | RT,-20 °C  |
| Storage Comment:    | The lyophilized plasmid is stable for up to one year when stored at ambient temperature.             |
|                     | Following dissolution in 100 $\mu$ L dH2O, store at -20 °C. Lyophilized primers are stable for up to |
|                     | one year when stored at ambient temperature. Following dissolution in 10 µL dH2O, store at -20 °C.   |
| Expiry Date:        | 12 months  |
