Datasheet for ABIN3316771 Human C2orf27B cDNA Clone in Mammalian Expression Vector

Overview Quantity: 10 µg Gene: C2orf27B Species: Human Insert: cDNA Mammalian Expression Vector Vector: Application: Protein Expression (PExp) **Product Details** Untagged full-length cDNA clone from Human C2orf27B is ideal for over-expression of native Purpose: protein for functional studies. Brand: TrueClones® Vector Backbone: pCMV6-AC Promoter: Enhanced CMV Promoter Selectable Marker: Neomycin Bacterial Resistance: Ampicillin Expression Type: Transient, Stable Specificity: Restriction Site: ECoRI-NotI Characteristics: · These cDNA clones are isolated from full-length cDNA libraries and usually contain the coding sequence as well as the untranslated regions (UTRs) of the mRNA transcript appropriate to the library from which they were isolated. These cDNA clones are ideal for over-expression of native proteins for functional studies. Provided as 10 µg transfection-ready plasmids.

• Every lot of primer is tested to provide clean sequencing of cDNA clones.

Purification:

The DNAs were purified using PowerPrep HP Plasmid isolation kits for transfection ready

Product Details

	plasmids.
Sequencing Primer:	VP1.5 (forward) 5'GGACTTTCCAAAATGTCG 3', XL39 (reverse) 5'ATTAGGACAAGGCTGGTGGG 3'
Components:	 The cDNA clone is shipped in a 2-D bar-coded Matrix tube as dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

Target Details

Gene:	C2orf27B
Alternative Name:	C2orf27B
NCBI Accession:	NM_214461, NP_999626
Application Details	
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Storage:	RT,-20 °C
Storage Comment:	The lyophilized plasmid is stable for up to one year when stored at ambient temperature. Following dissolution in 100 μ L dH2O, store at -20 °C. Lyophilized primers are stable for up to one year when stored at ambient temperature. Following dissolution in 10 μ L dH2O, store at -20 °C.
Expiry Date:	12 months
