## **Human HTT siRNA Oligo**

( )	11/05	1/10	1 A /
	$\square$	$\vee$	\/\/
$\sim$	ver	V 1 C	v v

Quantity:	1 kit
Gene:	Huntingtin (HTT)
Species:	Human
Oligo-Type:	siRNA Oligo
Application:	RNA Interference (RNAi)

#### **Product Details**

Purpose:	siRNA (27 mer) kit with 3 gene-specific unique siRNA duplexes and negative control for gene knockdown.
Brand:	Trilencer-27
Sequence:	Available with shipment
Purification:	HPLC purified
Components:	<ul> <li>HTT (Human) - 3 unique 27mer siRNA duplexes - 2 nmol each</li> <li>Trilencer-27 Universal Scrambled Negative Control siRNA Duplex - 2 nmol</li> <li>RNAse free siRNA Duplex Resuspension Buffer - 2 ml</li> </ul>

### Target Details

Gene:	Huntingtin (HTT)
Alternative Name: HTT (HTT Products)	
Application Details	
Application Notes:	<ul> <li>No. of transfections: Approximately 330 transfections/2nmol in 24-well plate under optimized conditions (final conc. 10 nM)</li> <li>Quality Control: Tested by ESI-MS</li> </ul>

## Application Details

Restrictions:	For Research Use only	
Handling		
Format:	Lyophilized	
Reconstitution:	<ul> <li>2 nmoles of each duplex is provided (including the control duplex). Addition of 100 µL of RNase-free Duplex Buffer will result in 20 µM final concentration, vortex thoroughly and microfuge prior to use.</li> <li>Heat to 94 °C for 2 minutes, remove from heat and allow tube to cool to room temperature.</li> </ul>	
	The oligos were dried in duplex form so heating may not be necessary, however following this protocol ensures that the contents will be fully duplexed.	
Storage:	-20 °C	
Storage Comment:	The dried duplexes can be stored at 4 °C. However, once reconstituted with dH2O, the plasmids must be stored at -20°C.	
Expiry Date:	12 months
