Datasheet for ABIN3381326 Human HPR cDNA Clone in Mammalian Expression Vector

Overview	
Quantity:	10 µg
Gene:	HPR
Species:	Human
Insert:	cDNA
Vector:	Mammalian Expression Vector
Application:	Protein Expression (PExp)
Product Details	
Purpose:	Untagged full-length cDNA clone from Human HPR is ideal for over-expression of native protein for functional studies.
Brand:	TrueClones®
Insert Length:	1300 bp
Vector Backbone:	pCMV6-XL4
Promoter:	Enhanced CMV Promoter, T7 Promoter
Bacterial Resistance:	Ampicillin
Expression Type:	Transient
Characteristics:	 These cDNA clones are isolated from full-length cDNA libraries and usually contain the coding sequence as well as the untranslated regions (UTRs) of the mRNA transcript appropriate to the library from which they were isolated. These cDNA clones are ideal for over-expression of native proteins for functional studies. Provided as 10 µg transfection-ready plasmids. Every lot of primer is tested to provide clean sequencing of cDNA clones.
Purification:	The DNAs were purified using PowerPrep HP Plasmid isolation kits for transfection ready plasmids.

Product Details	
Sequencing Primer:	VP1.5 (forward) 5'GGACTTTCCAAAATGTCG 3', XL39 (reverse) 5'ATTAGGACAAGGCTGGTGGG 3'
Components:	 The cDNA clone is shipped in a 2-D bar-coded Matrix tube as dried plasmid DNA. The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.

Target Details

Gene:	HPR
Alternative Name:	HPR (HPR Products)
Background:	This gene encodes a haptoglobin-related protein that binds hemoglobin as efficiently as
	haptoglobin. Unlike haptoglobin, plasma concentration of this protein is unaffected in patients
	with sickle cell anemia and extensive intravascular hemolysis, suggesting a difference in
	binding between haptoglobin-hemoglobin and haptoglobin-related protein-hemoglobin
	complexes to CD163, the hemoglobin scavenger receptor. This protein may also be a clinically
	important predictor of recurrence of breast cancer. [provided by RefSeq, Oct 2011].
NCBI Accession:	NM_020995, NP_066275

Application Details

Restrictions:

For Research Use only

Handling

Format:	Lyophilized
Storage:	RT,-20 °C
Storage Comment:	The lyophilized plasmid is stable for up to one year when stored at ambient temperature. Following dissolution in 100 μ L dH2O, store at -20 °C. Lyophilized primers are stable for up to one year when stored at ambient temperature. Following dissolution in 10 μ L dH2O, store at -20 °C.
Expiry Date:	12 months
