## **Human DUX1 cDNA Clone in Mammalian Expression Vector**

| Overview              |  |
|-----------------------|--|
| Quantity:             | 10 μg  |
| Gene:                 | DUX1   |
| Species:              | Human  |
| Insert:               | cDNA   |
| Vector:               | Mammalian Expression Vector  |
| Application:          | Protein Expression (PExp)  |
| Product Details       |  |
| Purpose:              | Untagged full-length cDNA clone from Human DUX1 is ideal for over-expression of native   |
|                       | protein for functional studies.  |
| Brand:                | TrueClones®  |
| Insert Length:        | 500 bp   |
| Vector Backbone:      | pCMV6-XL5  |
| Promoter:             | Enhanced CMV Promoter, T7 Promoter   |
| Bacterial Resistance: | Ampicillin   |
| Expression Type:      | Transient  |
| Characteristics:      | <ul> <li>These cDNA clones are isolated from full-length cDNA libraries and usually contain the coding sequence as well as the untranslated regions (UTRs) of the mRNA transcript appropriate to the library from which they were isolated.</li> <li>These cDNA clones are ideal for over-expression of native proteins for functional studies. Provided as 10 µg transfection-ready plasmids.</li> <li>Every lot of primer is tested to provide clean sequencing of cDNA clones.</li> </ul> |
| Purification:         | The DNAs were purified using PowerPrep HP Plasmid isolation kits for transfection ready plasmids.  |

| Product Details     |   |
|---------------------|---|
| Sequencing Primer:  | VP1.5 (forward) 5'GGACTTTCCAAAATGTCG 3', XL39 (reverse) 5'ATTAGGACAAGGCTGGTGGG 3'   |
| Components:         | <ul> <li>The cDNA clone is shipped in a 2-D bar-coded Matrix tube as dried plasmid DNA.</li> <li>The package also includes 100 pmols of both the corresponding 5' and 3' vector primers in separate vials.</li> </ul>   |
| Target Details      |   |
| Gene:               | DUX1  |
| Alternative Name:   | DUX1 (DUX1 Products)  |
| Background:         | The human genome contains hundreds of repeats of the 3.3-kb family in regions associated with heterochromatin. The DUX gene family, including DUX1, resides within these 3.3-kb repeated elements (Beckers et al., 2001 [PubMed 11245978]). See DUX4 (MIM 606009).[supplied by OMIM, Mar 2008].       |
| NCBI Accession:     | NM_012146, NP_036278  |
| Application Details |   |
| Restrictions:       | For Research Use only   |
| Handling            |   |
| Format:             | Lyophilized   |
| Storage:            | RT,-20 °C   |
| Storage Comment:    | The lyophilized plasmid is stable for up to one year when stored at ambient temperature. Following dissolution in 100 $\mu$ L dH2O, store at -20 °C. Lyophilized primers are stable for up to one year when stored at ambient temperature. Following dissolution in 10 $\mu$ L dH2O, store at -20 °C. |
| Expiry Date:        | 12 months   |
