## Human SHANK2-AS3 shRNA in Retroviral Vector

### Overview

|              |                         |
|--------------|-------------------------|
| Quantity:    | 1 kit                   |
| Gene:        | SHANK2-AS3              |
| Species:     | Human                   |
| Insert:      | shRNA                   |
| Vector:      | Retroviral Vector       |
| Application: | RNA Interference (RNAi) |

### Product Details

|                       |  |
|-----------------------|--|
| Purpose:              | Pre-designed Hush-29 shRNAs in viral vectors with proven effectiveness for knock-down of Human C11orf76.   |
| Brand:                | HuSH-29™   |
| Vector Backbone:      | pRS  |
| Promoter:             | U6 Promoter  |
| Selectable Marker:    | Puromycin  |
| Bacterial Resistance: | Ampicillin   |
| Expression Type:      | Transient, Stable  |
| Specificity:          | <ul style="list-style-type: none"> <li>The HuSH shRNA gene-specific expression cassettes were optimized to include both the termination signal for RNA Pol III and GC content targeted at 50 % to further improve the quality of the gene-specific shRNA expression vectors.</li> <li>One of the four constructs at minimum are guaranteed to produce 70 % or more gene expression knock-down provided a minimum transfection efficiency of 80 % is achieved.</li> </ul> |
| Characteristics:      | <ul style="list-style-type: none"> <li>The shRNA gene-specific expression cassettes are prepared using synthetic oligonucleotides.</li> <li>These oligonucleotide sequences were computer designed for optimal suppression of gene</li> </ul>  |

## Product Details

---

- expression and minimal off-target effects.
- All shRNA sequences are verified through DNA sequencing analysis.

- Components:
- Gene-specific shRNA expression pRS vectors, 5 ug plasmid DNA per vial.
  - Four unique constructs per gene.
  - HuSH 29-mer NonEffective Scrambled pRS 5 ug plasmid DNA.
  - .

## Target Details

---

Gene: SHANK2-AS3

Alternative Name: C11orf76

## Application Details

---

- Application Notes:
- Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection.
  - To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples..

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Storage: 4 °C/-20 °C

Storage Comment: The dried plasmids can be stored at 4°C. However, once reconstituted with dH<sub>2</sub>O, the plasmids must be stored at -20°C.
