Human SPATA31D4 shRNA in Retroviral Vector

| Overview | | |
|-----------------------|--|--|
| Quantity: | 1 kit | |
| Gene: | SPATA31D4 | |
| Species: | Human | |
| Insert: | shRNA | |
| Vector: | Retroviral Vector | |
| Application: | RNA Interference (RNAi) | |
| Product Details | | |
| Purpose: | Pre-designed Hush-29 shRNAs in viral vectors with proven effectiveness for knock-down of | |
| | Human FAM75D4. | |
| Brand: | HuSH-29™ | |
| Vector Backbone: | pRS | |
| Promoter: | U6 Promoter | |
| Selectable Marker: | Puromycin | |
| Bacterial Resistance: | Ampicillin | |
| Expression Type: | Transient, Stable | |
| Specificity: | The HuSH shRNA gene-specific expression cassettes were optimized to include both the termination signal for RNA Pol III and GC content targeted at 50 % to further improve the quality of the gene-specific shRNA expression vectors. One of the four constructs at minimum are guaranteed to produce 70 % or more gene expression knock-down provided a minimum transfection efficiency of 80 % is achieved. | |
| Characteristics: | The shRNA gene-specific expression cassettes are prepared using synthetic oligonucleotides. These oligonucleotide sequences were computer designed for optimal suppression of gene | |

Product Details expression and minimal off-target effects. • All shRNA sequences are verified through DNA sequencing analysis. • Gene-specific shRNA expression pRS vectors, 5 ug plasmid DNA per vial. Components: · Four unique constructs per gene. · HuSH 29-mer NonEffective Scrambled pRS 5 ug plasmid DNA. **Target Details** SPATA31D4 Gene: Alternative Name: FAM75D4 **Application Details** · Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA Application Notes: constructs 72 hrs post transfection. • To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples..

| Restrictions: | For Research Use only |
|---------------|-----------------------|
| | |

Handling

| Format: | Lyophilized |
|------------------|---|
| Storage: | 4 °C/-20 °C |
| Storage Comment: | The dried plasmids can be stored at 4°C. However, once reconstituted with dH2O, the plasmids must be stored at -20°C. |
