

Datasheet for ABIN3738497

Human CTR9 shRNA in Retroviral Vector (GFP tag)

1 Publication

Overview

Quantity:	1 kit
Gene:	CTR9
Species:	Human
Fusion tag:	GFP tag
Insert:	shRNA
Vector:	Retroviral Vector
Application:	RNA Interference (RNAi)

Product Details

Purpose:	Pre-designed Hush-29 shRNAs in viral vectors with proven effectiveness for knock-down of Human CTR9.
Brand:	HuSH-29™
Vector Backbone:	pGFP-V-RS
Promoter:	U6 Promoter
Selectable Marker:	Puromycin
Bacterial Resistance:	Kanamycin
Expression Type:	Transient, Stable
Specificity:	- The HuSH shRNA gene-specific expression cassettes were optimized to include both the termination signal for RNA Pol III and GC content targeted at 50 % to further improve the quality of the gene-specific shRNA expression vectors. - One of the four constructs at minimum are guaranteed to produce 70 % or more gene expression knock-down provided a minimum transfection efficiency of 80 % is achieved.

Product Details

Characteristics:	• The shRNA gene-specific expression cassettes are prepared using synthetic oligonucleotides. • These oligonucleotide sequences were computer designed for optimal suppression of gene expression and minimal off-target effects. • All shRNA sequences are verified through DNA sequencing analysis.
------------------	---

Components:	• Gene-specific shRNA in pGFP-C-shLenti vector, 4 unique constructs per gene, 5 ug per vial. • HuSH 29-mer Scrambled in pGFP-C-shLenti 5 ug plasmid DNA.
-------------	--

Target Details

Gene:	CTR9
Alternative Name:	CTR9 (CTR9 Products)

Application Details

Application Notes:	• Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection. • To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples..
--------------------	---

Restrictions:	For Research Use only
---------------	-----------------------

Handling

Format:	Lyophilized
Storage:	4 °C/-20 °C
Storage Comment:	The dried plasmids can be stored at 4°C. However, once reconstituted with dH2O, the plasmids must be stored at -20°C.
