## Datasheet for ABIN3761618 Human IGF2-AS shRNA in Lentiviral Vector (GFP tag)

01011010	
Quantity:	1 kit
Gene:	IGF2AS (IGF2-AS)
Species:	Human
Fusion tag:	GFP tag
Insert:	shRNA
Vector:	Lentiviral Vector
Application:	RNA Interference (RNAi)
Product Details	
Purpose:	Pre-designed Hush-29 shRNAs in viral vectors with proven effectiveness for knock-down of Human IGF2AS.
Brand:	HuSH-29™
Vector Backbone:	pGFP-C-shLenti
Promoter:	U6 Promoter
Selectable Marker:	Puromycin
Bacterial Resistance:	Chloramphenicol
Expression Type:	Transient, Stable
Specificity:	<ul> <li>The HuSH shRNA gene-specific expression cassettes were optimized to include both the termination signal for RNA Pol III and GC content targeted at 50 % to further improve the quality of the gene-specific shRNA expression vectors.</li> <li>One of the four constructs at minimum are guaranteed to produce 70 % or more gene expression knock-down provided a minimum transfection efficiency of 80 % is achieved.</li> </ul>
Characteristics:	The shRNA gene-specific expression cassettes are prepared using synthetic

The shRNA gene-specific expression cassettes are prepared using synthetic

Product Details	
	<ul> <li>oligonucleotides.</li> <li>These oligonucleotide sequences were computer designed for optimal suppression of gene expression and minimal off-target effects.</li> <li>All shRNA sequences are verified through DNA sequencing analysis.</li> </ul>
Components:	<ul> <li>Gene-specific shRNA in pGFPC-shLenti vector, 4 unique constructs per gene, 5 ug per vial.</li> <li>HuSH 29-mer Scrambled in pGFP-C-shLenti 5 ug plasmid DNA.</li> </ul>
Target Details	
Gene:	IGF2AS (IGF2-AS)
Alternative Name:	IGF2AS (IGF2-AS Products)
Application Details	
Application Notes:	<ul> <li>Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection.</li> <li>To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples</li> </ul>
Restrictions:	For Research Use only
Handling	
Format:	Lyophilized
Storage:	4 °C/-20 °C
Storage Comment:	The dried plasmids can be stored at 4°C. However, once reconstituted with dH2O, the plasmids must be stored at -20°C.
