## Datasheet for ABIN3763323 Human ATP1A1OS shRNA in Lentiviral Vector (GFP tag)

| Overview     |                         |
|--------------|-------------------------|
| Quantity:    | 1 kit                   |
| Gene:        | ATP1A10S                |
| Species:     | Human                   |
| Fusion tag:  | GFP tag                 |
| Insert:      | shRNA                   |
| Vector:      | Lentiviral Vector       |
| Application: | RNA Interference (RNAi) |

## Product Details

| Purpose:              | Pre-designed Hush-29 shRNAs in viral vectors with proven effectiveness for knock-down of  |
|-----------------------|---|
|                       | Human ATP1A10S.   |
|                       |   |
| Brand:                | HuSH-29™  |
| Vector Backbone:      | pGFP-C-shLenti  |
| Promoter:             | U6 Promoter   |
| Selectable Marker:    | Puromycin   |
| Bacterial Resistance: | Chloramphenicol   |
| Expression Type:      | Transient, Stable   |
| Specificity:          | • The HuSH shRNA gene-specific expression cassettes were optimized to include both the    |
|                       | termination signal for RNA Pol III and GC content targeted at 50 % to further improve the |
|                       | quality of the gene-specific shRNA expression vectors.                                    |
|                       | One of the four constructs at minimum are guaranteed to produce 70 % or more gene         |
|                       | expression knock-down provided a minimum transfection efficiency of 80 % is achieved.     |
| Characteristics:      | The shRNA gene-specific expression cassettes are prepared using synthetic                 |

| Product Details     |  |
|---------------------|--|
|                     | <ul> <li>oligonucleotides.</li> <li>These oligonucleotide sequences were computer designed for optimal suppression of gene expression and minimal off-target effects.</li> <li>All shRNA sequences are verified through DNA sequencing analysis.</li> </ul>  |
| Components:         | <ul> <li>Gene-specific shRNA in pGFPC-shLenti vector, 4 unique constructs per gene, 5 ug per vial.</li> <li>HuSH 29-mer Scrambled in pGFP-C-shLenti 5 ug plasmid DNA.</li> </ul>   |
| Target Details      |  |
| Gene:               | ATP1A10S   |
| Alternative Name:   | ATP1A10S   |
| Application Details |  |
| Application Notes:  | <ul> <li>Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection.</li> <li>To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples</li> </ul> |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Storage:            | 4 °C/-20 °C  |
| Storage Comment:    | The dried plasmids can be stored at 4°C. However, once reconstituted with dH2O, the plasmids must be stored at -20°C.  |
