

Datasheet for ABIN3765121

## Human GAGE12G shRNA in Lentiviral Vector (GFP tag)

### Overview

Quantity:	1 kit
Gene:	G Antigen 12G (GAGE12G)
Species:	Human
Fusion tag:	GFP tag
Insert:	shRNA
Vector:	Lentiviral Vector
Application:	RNA Interference (RNAi)

### Product Details

Purpose:	Pre-designed Hush-29 shRNAs in viral vectors with proven effectiveness for knock-down of Human GAGE12G.
Brand:	HuSH-29™
Vector Backbone:	pGFP-C-shLenti
Promoter:	U6 Promoter
Selectable Marker:	Puromycin
Bacterial Resistance:	Chloramphenicol
Expression Type:	Transient, Stable
Specificity:	<ul style="list-style-type: none"> <li>The HuSH shRNA gene-specific expression cassettes were optimized to include both the termination signal for RNA Pol III and GC content targeted at 50 % to further improve the quality of the gene-specific shRNA expression vectors.</li> <li>One of the four constructs at minimum are guaranteed to produce 70 % or more gene expression knock-down provided a minimum transfection efficiency of 80 % is achieved.</li> </ul>
Characteristics:	<ul style="list-style-type: none"> <li>The shRNA gene-specific expression cassettes are prepared using synthetic</li> </ul>

## Product Details

---

oligonucleotides.

- These oligonucleotide sequences were computer designed for optimal suppression of gene expression and minimal off-target effects.
- All shRNA sequences are verified through DNA sequencing analysis.

---

### Components:

- Gene-specific shRNA in pGFPC-shLenti vector, 4 unique constructs per gene, 5 ug per vial.
- HuSH 29-mer Scrambled in pGFP-C-shLenti 5 ug plasmid DNA.

## Target Details

---

Gene: G Antigen 12G (GAGE12G)

Alternative Name: GAGE12G ([GAGE12G Products](#))

## Application Details

---

- Application Notes:
- Western Blot data is recommended over qPCR to evaluate the silencing effect of the shRNA constructs 72 hrs post transfection.
  - To properly assess knockdown, the gene expression level from the included scramble control vector must be used in comparison with the target-specific shRNA transfected samples..

---

Restrictions: For Research Use only

## Handling

---

Format: Lyophilized

Storage: 4 °C/-20 °C

Storage Comment: The dried plasmids can be stored at 4°C. However, once reconstituted with dH2O, the plasmids must be stored at -20°C.
