Datasheet for ABIN4707539 Human OR14I1 cDNA Clone in Bacterial Expression Vector (His-MBP)

Overview

Quantity:	500 ng
Gene:	OR14I1
Species:	Human
Fusion tag:	His-MBP
Insert:	cDNA
Vector:	Bacterial Expression Vector
Application:	Cloning (Clon)

Product Details

Purpose:	Bacterial expression of Human OR14I1 with His-MBP
Insert Length:	936 bp
Vector Backbone:	pPB-His-MBP
Promoter:	T7 Promoter
Bacterial Resistance:	Kanamycin
Expression Type:	Transient
Specificity:	5-Nhel and 3-Xhol Fusion tag: Dual N-terminal tag, 6X Histidine followed by Maltose Binding Protein which is cleavable with Thrombin (Size 43 kDa)
Sequencing Primer:	MBP Forward primer: 5'-CGCAGATGTCCGCTTTCTGG-3', T7 terminator primer: 5'- GCTAGTTATTGCTCAGCGG-3'
Target Details	

Gene: OR14I1

OR14I1 (OR14I1 Products)
NM_001004734
The pPB vectors are low-medium copy number vectors in which the gene expression is driven
by the strong T7 promoter.
Below are some basic guidelines for using the pPB vectors for protein production:
1. The pPB vectors are designed to be used with E. coli strains that are DE3 lysogens i.e. the
host E. coli cell has a source of T7 RNA polymerase.
2. Recombinant protein induction is usually done at OD600 of 0.6-1.2 using Isopropyl β -D-1-
thiogalactopyranoside (IPTG) at a final concentration of 0.05 -1mM.
3. The ideal concentration of IPTG must be determined empirically for each recombinant
protein/cell-line. Similarly, the length of time and temperature for induction provide other
variables that need to be optimized on a case-to-case basis.
4. For toxic proteins, it is recommended to go for shorter induction time and also to try and
suppress basal recombinant gene expression through (a) addition of glucose or use of pLysS
plasmid. Please note that special cell-lines are also available in the market that cater to
expression of toxic proteins.
5. Once grown for the desired length of time, harvest cells by centrifugation and either freeze
the cells at -80°C (as such or after re-suspending in the desired buffer) or proceed with the
purification.
For Research Use only
Liquid
10 mM Tris-HCl, 1 mM EDTA, pH 8.0
-20 °C
