# Datasheet for ABIN4841019 Human ST8SIA6 cDNA Clone in Bacterial Expression Vector (His-GST)

#### Overview

Quantity:	500 ng
Gene:	ST8SIA6
Species:	Human
Fusion tag:	His-GST
Insert:	cDNA
Vector:	Bacterial Expression Vector
Application:	Cloning (Clon)

#### Product Details

Purpose:	Bacterial expression of Human ST8SIA6 with His-GST
Insert Length:	1197 bp
Vector Backbone:	pPB-His-GST
Promoter:	T7 Promoter
Bacterial Resistance:	Kanamycin
Expression Type:	Transient
Specificity:	5-Nhel and 3-Xhol Fusion tag: Dual N-terminal tag, 6X Histidine followed by Glutathione-S-Transferase Protein which is cleavable with TEV (Size 27.9 kDa)
Sequencing Primer:	GST Forward primer: 5'-CACGTTTGGTGGTGGCGAC3', T7 terminator primer: 5'- GCTAGTTATTGCTCAGCGG-3'

### Target Details

Gene:

ST8SIA6

### Target Details

Alternative Name:

ST8SIA6 (ST8SIA6 Products)

## Application Details

	<ol> <li>Recombinant protein induction is usually done at OD600 of 0.6-1.2 using Isopropyl β-D-1- thiogalactopyranoside (IPTG) at a final concentration of 0.05 -1mM.</li> <li>The ideal concentration of IPTG must be determined empirically for each recombinant protein/cell-line. Similarly, the length of time and temperature for induction provide other variables that need to be optimized on a case-to-case basis.</li> <li>For toxic proteins, it is recommended to go for shorter induction time and also to try and suppress basal recombinant gene expression through (a) addition of glucose or use of pLysS plasmid. Please note that special cell-lines are also available in the market that cater to</li> </ol>

	2. Recombinant protein induction is usually done at OD600 of 0.6-1.2 using Isopropyl β-D-1-
	host E. coli cell has a source of T7 RNA polymerase.
	1. The pPB vectors are designed to be used with E. coli strains that are DE3 lysogens i.e. the
	Below are some basic guidelines for using the pPB vectors for protein production:
Application Notes:	The pPB vectors are low-medium copy number vectors in which the gene expression is driven by the strong T7 promoter.

## Handling

Format:	Liquid
Buffer:	10 mM Tris-HCl, 1 mM EDTA, pH 8.0
Storage:	-20 °C
Storage Comment:	1 year when stored at -20° C or lower in a non-frost free freezer.
Expiry Date:	12 months
