Datasheet for ABIN4844014 Human ZNF623 cDNA Clone in Bacterial Expression Vector (His-GST)

Overview

| Quantity: | 500 ng |
|--------------|-----------------------------|
| Gene: | ZNF623 |
| Species: | Human |
| Fusion tag: | His-GST |
| Insert: | cDNA |
| Vector: | Bacterial Expression Vector |
| Application: | Cloning (Clon) |

Product Details

| Purpose: | Bacterial expression of Human ZNF623 with His-GST | | | |
|-----------------------|---|--|--|--|
| Insert Length: | 1611 bp | | | |
| Vector Backbone: | pPB-His-GST | | | |
| Promoter: | T7 Promoter | | | |
| Bacterial Resistance: | Kanamycin | | | |
| Expression Type: | Transient | | | |
| Specificity: | 5-Nhel and 3-Xhol Fusion tag: Dual N-terminal tag, 6X Histidine followed by Glutathione-S-Transferase Protein which is cleavable with TEV (Size 27.9 kDa) | | | |
| Sequencing Primer: | GST Forward primer: 5'-CACGTTTGGTGGTGGCGAC3', T7 terminator primer: 5'- GCTAGTTATTGCTCAGCGG-3' | | | |

Target Details

Gene:

ZNF623

| Target Details | | | | |
|---------------------|--|--|--|--|
| Alternative Name: | ZNF623 (ZNF623 Products) | | | |
| NCBI Accession: | NM_014789 | | | |
| Application Details | | | | |
| Application Notes: | The pPB vectors are low-medium copy number vectors in which the gene expression is driven | | | |
| | by the strong T7 promoter. | | | |
| | Below are some basic guidelines for using the pPB vectors for protein production: | | | |
| | 1. The pPB vectors are designed to be used with E. coli strains that are DE3 lysogens i.e. the | | | |
| | host E. coli cell has a source of T7 RNA polymerase. | | | |
| | 2. Recombinant protein induction is usually done at OD600 of 0.6-1.2 using Isopropyl β -D-1- | | | |
| | thiogalactopyranoside (IPTG) at a final concentration of 0.05 -1mM. | | | |
| | 3. The ideal concentration of IPTG must be determined empirically for each recombinant | | | |
| | protein/cell-line. Similarly, the length of time and temperature for induction provide other | | | |
| | variables that need to be optimized on a case-to-case basis. | | | |
| | 4. For toxic proteins, it is recommended to go for shorter induction time and also to try and | | | |
| | suppress basal recombinant gene expression through (a) addition of glucose or use of pLysS | | | |
| | plasmid. Please note that special cell-lines are also available in the market that cater to | | | |
| | expression of toxic proteins. | | | |
| | 5. Once grown for the desired length of time, harvest cells by centrifugation and either freeze | | | |
| | the cells at -80°C (as such or after re-suspending in the desired buffer) or proceed with the | | | |
| | purification. | | | |
| Restrictions: | For Research Use only | | | |
| Handling | | | | |
| Format: | Liquid | | | |
| Buffer: | 10 mM Tris-HCI, 1 mM EDTA, pH 8.0 | | | |
