## Datasheet for ABIN5163094 Human TSPAN19 CRISPR gRNA in Lenti Particles

| Overview              |                                                                                                                   |
|-----------------------|-------------------------------------------------------------------------------------------------------------------|
| Quantity:             | 300 µL                                                                                                            |
| Gene:                 | Tetraspanin 19 (TSPAN19)                                                                                          |
| Species:              | Human                                                                                                             |
| Insert:               | gRNA                                                                                                              |
| Vector:               | Lentiviral Vector                                                                                                 |
| Application:          | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN)                                        |
| Product Details       |                                                                                                                   |
| Purpose:              | Individual gRNA against TSPAN19 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (Cas9 required separately) |
| Vector Backbone:      | pLenti-U6-sgRNA-PGK-Neo                                                                                           |
| Promoter:             | U6 Promoter, PGK Promoter                                                                                         |
| Selectable Marker:    | Neomycin                                                                                                          |
| Bacterial Resistance: | Ampicillin                                                                                                        |
| Expression Type:      | Stable, Transient                                                                                                 |
| Sequence:             | Sequence available upon placing order                                                                             |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.                                                               |
| Components:           | Lentiviral particles with an individual gRNA (300 $\mu L)$ for a specific sequence of TSPAN19                     |

## Target Details

| Gene:             | Tetraspanin 19 (TSPAN19) |
|-------------------|--------------------------|
| Alternative Name: | TSPAN19                  |
| NCBI Accession:   | NM_001100917             |

| Application Details |                                                                                                           |
|---------------------|-----------------------------------------------------------------------------------------------------------|
| Application Notes:  | Recommended for quality control: Restriction Enzyme Digest and Sequencing                                 |
| Restrictions:       | For Research Use only                                                                                     |
| Handling            |                                                                                                           |
| Format:             | Viral Particles                                                                                           |
| Storage:            | -80 °C                                                                                                    |
| Expiry Date:        | 12 months                                                                                                 |
| Publications        |                                                                                                           |
