

Datasheet for ABIN5166694

## Human CCDC22 CRISPR gRNA in Lenti Particles

### Overview

|              |                                                                            |
|--------------|----------------------------------------------------------------------------|
| Quantity:    | 300 µL                                                                     |
| Gene:        | CCDC22                                                                     |
| Species:     | Human                                                                      |
| Insert:      | gRNA                                                                       |
| Vector:      | Lentiviral Vector                                                          |
| Application: | Protein Expression (PEXP), Genome Editing with Engineered Nucleases (GEEN) |

### Product Details

|                       |                                                                                                                  |
|-----------------------|------------------------------------------------------------------------------------------------------------------|
| Purpose:              | Individual gRNA against CCDC22 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (Cas9 required separately) |
| Vector Backbone:      | pLenti-U6-sgRNA-PGK-Neo                                                                                          |
| Promoter:             | U6 Promoter, PGK Promoter                                                                                        |
| Selectable Marker:    | Neomycin                                                                                                         |
| Bacterial Resistance: | Ampicillin                                                                                                       |
| Expression Type:      | Stable, Transient                                                                                                |
| Sequence:             | Sequence available upon placing order                                                                            |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.                                                              |
| Components:           | Lentiviral particles with an individual gRNA (300 µL) for a specific sequence of CCDC22                          |

### Target Details

|                   |                                            |
|-------------------|--------------------------------------------|
| Gene:             | CCDC22                                     |
| Alternative Name: | CCDC22 ( <a href="#">CCDC22 Products</a> ) |
| NCBI Accession:   | <a href="#">NM_014008</a>                  |

## Application Details

---

Application Notes: Recommended for quality control: Restriction Enzyme Digest and Sequencing

---

Restrictions: For Research Use only

## Handling

---

Format: Viral Particles

---

Storage: -80 °C

---

Expiry Date: 12 months

## Publications

---
