## **Human FAM201A CRISPR gRNA in Lenti Particles**

| Overview              |                                                                                                                  |
|-----------------------|------------------------------------------------------------------------------------------------------------------|
| Quantity:             | 3 x 300 μL                                                                                                       |
| Gene:                 | FAM201A                                                                                                          |
| Species:              | Human                                                                                                            |
| Insert:               | gRNA                                                                                                             |
| Vector:               | Lentiviral Vector                                                                                                |
| Application:          | Genome Editing with Engineered Nucleases (GEEN), Protein Expression (PExp)                                       |
| Product Details       |                                                                                                                  |
| Purpose:              | Set of 3 gRNA against C9orf122 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (Cas9 required separately) |
| Vector Backbone:      | pLenti-U6-sgRNA-PGK-Neo                                                                                          |
| Promoter:             | U6 Promoter, PGK Promoter                                                                                        |
| Selectable Marker:    | Neomycin                                                                                                         |
| Bacterial Resistance: | Ampicillin                                                                                                       |
| Expression Type:      | Stable, Transient                                                                                                |
| Sequence:             | Sequence available upon placing order                                                                            |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.                                                              |
| Components:           | Lentiviral particles with a set of 3 gRNAs (3 x 300 µL) covering different sequences of C9orf122                 |
| Target Details        |                                                                                                                  |
| Gene:                 | FAM201A                                                                                                          |
| Alternative Name:     | C9orf122                                                                                                         |
| NCBI Accession:       | NR_027294                                                                                                        |

## **Application Details**

| Application Notes: | Recommended for quality control: Restriction Enzyme Digest and Sequencing                             |
|--------------------|-------------------------------------------------------------------------------------------------------|
| Restrictions:      | For Research Use only                                                                                 |
| Handling           |                                                                                                       |
| Format:            | Viral Particles                                                                                       |
| Storage:           | -80 °C                                                                                                |
| Expiry Date:       | 12 months                                                                                             |
| Publications       |                                                                                                       |
