

Datasheet for ABIN5182859

## Human FAM220BP CRISPR gRNA in Lenti Particles

### Overview

|              |                                                                            |
|--------------|----------------------------------------------------------------------------|
| Quantity:    | 3 x 300 µL                                                                 |
| Gene:        | FAM220BP                                                                   |
| Species:     | Human                                                                      |
| Insert:      | gRNA                                                                       |
| Vector:      | Lentiviral Vector                                                          |
| Application: | Genome Editing with Engineered Nucleases (GEEN), Protein Expression (PExp) |

### Product Details

|                       |                                                                                                                            |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------|
| Purpose:              | Set of 3 gRNA against C9orf51 in Lentiviral Particles with a Titer of >1x10 <sup>7</sup> IU/mL. (Cas9 required separately) |
| Vector Backbone:      | pLenti-U6-sgRNA-PGK-Neo                                                                                                    |
| Promoter:             | U6 Promoter, PGK Promoter                                                                                                  |
| Selectable Marker:    | Neomycin                                                                                                                   |
| Bacterial Resistance: | Ampicillin                                                                                                                 |
| Expression Type:      | Stable, Transient                                                                                                          |
| Sequence:             | Sequence available upon placing order                                                                                      |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.                                                                        |
| Components:           | Lentiviral particles with a set of 3 gRNAs (3 x 300 µL) covering different sequences of C9orf51                            |

### Target Details

|                   |                              |
|-------------------|------------------------------|
| Gene:             | FAM220BP                     |
| Alternative Name: | C9orf51                      |
| NCBI Accession:   | <a href="#">XM_001713954</a> |

## Application Details

---

Application Notes: Recommended for quality control: Restriction Enzyme Digest and Sequencing

---

Restrictions: For Research Use only

## Handling

---

Format: Viral Particles

---

Storage: -80 °C

---

Expiry Date: 12 months

## Publications

---
