

Datasheet for ABIN5185798

## Mouse PSG28 CRISPR gRNA in Lenti Particles

### Overview

|              |                                                                            |
|--------------|----------------------------------------------------------------------------|
| Quantity:    | 300 µL                                                                     |
| Gene:        | CEA16 (PSG28)                                                              |
| Species:     | Mouse                                                                      |
| Insert:      | gRNA                                                                       |
| Vector:      | Lentiviral Vector                                                          |
| Application: | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN) |

### Product Details

|                       |                                                                                                                 |
|-----------------------|-----------------------------------------------------------------------------------------------------------------|
| Purpose:              | Individual gRNA against Psg28 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (Cas9 required separately) |
| Vector Backbone:      | pLenti-U6-sgRNA-PGK-Neo                                                                                         |
| Promoter:             | U6 Promoter, PGK Promoter                                                                                       |
| Selectable Marker:    | Neomycin                                                                                                        |
| Bacterial Resistance: | Ampicillin                                                                                                      |
| Expression Type:      | Stable, Transient                                                                                               |
| Sequence:             | Sequence available upon placing order                                                                           |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.                                                             |
| Components:           | Lentiviral particles with an individual gRNA (300 µL) for a specific sequence of Psg28                          |

### Target Details

|                   |                           |
|-------------------|---------------------------|
| Gene:             | CEA16 (PSG28)             |
| Alternative Name: | Psg28                     |
| NCBI Accession:   | <a href="#">NM_054063</a> |

## Application Details

---

Application Notes: Recommended for quality control: Restriction Enzyme Digest and Sequencing

---

Restrictions: For Research Use only

## Handling

---

Format: Viral Particles

---

Storage: -80 °C

---

Expiry Date: 12 months

## Publications

---
