## Human IQGAP2 CRISPR gRNA + Cas9 in Lenti Particles

| Overview              |                                                                                                                                                                                            |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Quantity:             | 300 μL                                                                                                                                                                                     |
| Gene:                 | IQGAP2                                                                                                                                                                                     |
| Species:              | Human                                                                                                                                                                                      |
| Insert:               | gRNA + Cas9                                                                                                                                                                                |
| Vector:               | Lentiviral Vector                                                                                                                                                                          |
| Application:          | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN)                                                                                                                 |
| Product Details       |                                                                                                                                                                                            |
| Purpose:              | Individual gRNA against IQGAP2 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (sgRNA and Cas9 in a single vector)                                                                  |
| Vector Backbone:      | pLenti-U6-sgRNA-SFFV-Cas9-2A-Puro                                                                                                                                                          |
| Promoter:             | U6 Promoter, SFFV Promoter                                                                                                                                                                 |
| Selectable Marker:    | Puromycin                                                                                                                                                                                  |
| Bacterial Resistance: | Ampicillin                                                                                                                                                                                 |
| Expression Type:      | Stable, Transient                                                                                                                                                                          |
| Sequence:             | Sequence available upon placing order                                                                                                                                                      |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.  Cas9 Nuclease is under the control of the SFFV promoter which should work for a vast majority of cells, except ES cells or iPS cells. |
| Sequencing Primer:    | U6 Forward Primer: 5'TACGTCCAAGGTCGGGCAGGAAGA3'                                                                                                                                            |
| Components:           | Lentiviral particles with an individual gRNA (300 µL) for a specific sequence of IQGAP2                                                                                                    |

## **Target Details**

| Gene:             | IQGAP2                   |
|-------------------|--------------------------|
| Alternative Name: | IQGAP2 (IQGAP2 Products) |
| NCBI Accession:   | NM_006633                |

| Application Details |                                                                                          |  |
|---------------------|------------------------------------------------------------------------------------------|--|
| Application Notes:  | Recommended for quality control: Restriction Enzyme Digest and Sequencing                |  |
| Restrictions:       | For Research Use only                                                                    |  |
| Handling            |                                                                                          |  |
| Format:             | Viral Particles                                                                          |  |
| Storage:            | -80 °C                                                                                   |  |
| Expiry Date:        | 12 months                                                                                |  |
| Publications        |                                                                                          |  |
