## Human HELZ CRISPR gRNA + Cas9 in Lenti Particles

| Overview              |  |
|-----------------------|--|
| Quantity:             | 300 μL   |
| Gene:                 | HELZ   |
| Species:              | Human  |
| Insert:               | gRNA + Cas9  |
| Vector:               | Lentiviral Vector  |
| Application:          | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN)                     |
| Product Details       |  |
| Purpose:              | Individual gRNA against HELZ in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (sgRNA and |
|                       | Cas9 in a single vector)   |
| Vector Backbone:      | pLenti-U6-sgRNA-SFFV-Cas9-2A-Puro  |
| Promoter:             | U6 Promoter, SFFV Promoter   |
| Selectable Marker:    | Puromycin  |
| Bacterial Resistance: | Ampicillin   |
| Expression Type:      | Stable, Transient  |
| Sequence:             | Sequence available upon placing order  |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.  |
|                       | Cas9 Nuclease is under the control of the SFFV promoter which should work for a vast majority  |
|                       | of cells, except ES cells or iPS cells.  |
| Sequencing Primer:    | U6 Forward Primer: 5'TACGTCCAAGGTCGGGCAGGAAGA3'  |
| Components:           | Lentiviral particles with an individual gRNA (300 µL) for a specific sequence of HELZ          |

## Target Details Gene: HELZ Alternative Name: HELZ (HELZ Products)

NCBI Accession: NM\_014877

| Application Notes: | Recommended for quality control: Restriction Enzyme Digest and Sequencing               |
|--------------------|---|
| Restrictions:      | For Research Use only   |
| Handling           |   |
| Format:            | Viral Particles   |
| Storage:           | -80 °C  |
| Expiry Date:       | 12 months   |
