Components:

### **Human DNTT CRISPR gRNA + Cas9 in Lenti Particles**

| Overview              |  |
|-----------------------|--|
| Quantity:             | 300 μL   |
| Gene:                 | TdT (DNTT)   |
| Species:              | Human  |
| Insert:               | gRNA + Cas9  |
| Vector:               | Lentiviral Vector  |
| Application:          | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN)                     |
| Product Details       |  |
| Purpose:              | Individual gRNA against DNTT in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (sgRNA and |
|                       | Cas9 in a single vector)   |
| Vector Backbone:      | pLenti-U6-sgRNA-SFFV-Cas9-2A-Puro  |
| Promoter:             | U6 Promoter, SFFV Promoter   |
| Selectable Marker:    | Puromycin  |
| Bacterial Resistance: | Ampicillin   |
| Expression Type:      | Stable, Transient  |
| Sequence:             | Sequence available upon placing order  |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.  |
|                       | Cas9 Nuclease is under the control of the SFFV promoter which should work for a vast majority  |
|                       | of cells, except ES cells or iPS cells.  |
| Sequencing Primer:    | U6 Forward Primer: 5'TACGTCCAAGGTCGGGCAGGAAGA3'  |
| 0                     | Louding and a setiment of the setiment of the setiment of DNIT                                 |

Lentiviral particles with an individual gRNA (300  $\mu$ L) for a specific sequence of DNTT

# Target Details Gene: TdT (DNTT) Alternative Name: DNTT (DNTT Products)

NCBI Accession: NM\_004088

#### **Application Details**

| Application Notes: | Recommended for quality control: Restriction Enzyme Digest and Sequencing |
|--------------------|---|
| Restrictions:      | For Research Use only   |

#### Handling

| Format:      | Viral Particles |
|--------------|-----------------|
| Storage:     | -80 °C          |
| Expiry Date: | 12 months       |
