## Mouse EIF2AK3 CRISPR gRNA + Cas9 in Lenti Particles

| Overview              |                                                                                                                                                                                            |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Quantity:             | 300 μL                                                                                                                                                                                     |
| Gene:                 | PERK (EIF2AK3)                                                                                                                                                                             |
| Species:              | Mouse                                                                                                                                                                                      |
| Insert:               | gRNA + Cas9                                                                                                                                                                                |
| Vector:               | Lentiviral Vector                                                                                                                                                                          |
| Application:          | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN)                                                                                                                 |
| Product Details       |                                                                                                                                                                                            |
| Purpose:              | Individual gRNA against Eif2ak3 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (sgRNA and Cas9 in a single vector)                                                                 |
| Vector Backbone:      | pLenti-U6-sgRNA-SFFV-Cas9-2A-Puro                                                                                                                                                          |
| Promoter:             | U6 Promoter, SFFV Promoter                                                                                                                                                                 |
| Selectable Marker:    | Puromycin                                                                                                                                                                                  |
| Bacterial Resistance: | Ampicillin                                                                                                                                                                                 |
| Expression Type:      | Stable, Transient                                                                                                                                                                          |
| Sequence:             | ""461 ATGGAGACCT CTTCCAG""                                                                                                                                                                 |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.  Cas9 Nuclease is under the control of the SFFV promoter which should work for a vast majority of cells, except ES cells or iPS cells. |
| Sequencing Primer:    | U6 Forward Primer: 5'TACGTCCAAGGTCGGGCAGGAAGA3'                                                                                                                                            |
| Components:           | Lentiviral particles with an individual gRNA (300 μL) for a specific sequence of Eif2ak3                                                                                                   |

## **Target Details**

| Gene:             | PERK (EIF2AK3)             |
|-------------------|----------------------------|
| Alternative Name: | Eif2ak3 (EIF2AK3 Products) |
| NCBI Accession:   | NM_010121                  |

| Application Notes: | Recommended for quality control: Restriction Enzyme Digest and Sequencing                 |
|--------------------|-------------------------------------------------------------------------------------------|
| Restrictions:      | For Research Use only                                                                     |
| Handling           |                                                                                           |
| Format:            | Viral Particles                                                                           |
| Storage:           | -80 °C                                                                                    |
| Expiry Date:       | 12 months                                                                                 |
| Publications       |                                                                                           |
