## Mouse SBF1 CRISPR gRNA + Cas9 in Lenti Particles

| Overview              |                                                                                                                         |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------|
| Quantity:             | 300 μL                                                                                                                  |
| Gene:                 | SBF1                                                                                                                    |
| Species:              | Mouse                                                                                                                   |
| Insert:               | gRNA + Cas9                                                                                                             |
| Vector:               | Lentiviral Vector                                                                                                       |
| Application:          | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN)                                              |
| Product Details       |                                                                                                                         |
| Purpose:              | Individual gRNA against Sbf1 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (sgRNA and Cas9 in a single vector) |
|                       | Casy III a sirigle vector)                                                                                              |
| Vector Backbone:      | pLenti-U6-sgRNA-SFFV-Cas9-2A-Puro                                                                                       |
| Promoter:             | U6 Promoter, SFFV Promoter                                                                                              |
| Selectable Marker:    | Puromycin                                                                                                               |
| Bacterial Resistance: | Ampicillin                                                                                                              |
| Expression Type:      | Stable, Transient                                                                                                       |
| Sequence:             | Sequence available upon placing order                                                                                   |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.                                                                     |
|                       | Cas9 Nuclease is under the control of the SFFV promoter which should work for a vast majority                           |
|                       | of cells, except ES cells or iPS cells.                                                                                 |
| Sequencing Primer:    | U6 Forward Primer: 5'TACGTCCAAGGTCGGGCAGGAAGA-3'                                                                        |
| Components:           | Lentiviral particles with an individual gRNA (300 μL) for a specific sequence of Sbf1                                   |

## **Target Details**

| Gene:             | SBF1                 |
|-------------------|----------------------|
| Alternative Name: | Sbf1 (SBF1 Products) |
| NCBI Accession:   | NM_001081030         |

| Application Notes: | Recommended for quality control: Restriction Enzyme Digest and Sequencing                     |
|--------------------|-----------------------------------------------------------------------------------------------|
| Restrictions:      | For Research Use only                                                                         |
| Handling           |                                                                                               |
| Format:            | Viral Particles                                                                               |
| Storage:           | -80 °C                                                                                        |
| Expiry Date:       | 12 months                                                                                     |
| Publications       |                                                                                               |
