## Mouse LYZ2 CRISPR gRNA + Cas9 in Lenti Particles

| Overview              |                                                                                                                                                                                            |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Quantity:             | 300 μL                                                                                                                                                                                     |
| Gene:                 | LYZ2                                                                                                                                                                                       |
| Species:              | Mouse                                                                                                                                                                                      |
| Insert:               | gRNA + Cas9                                                                                                                                                                                |
| Vector:               | Lentiviral Vector                                                                                                                                                                          |
| Application:          | Protein Expression (PExp), Genome Editing with Engineered Nucleases (GEEN)                                                                                                                 |
| Product Details       |                                                                                                                                                                                            |
| Purpose:              | Individual gRNA against Lyz2 in Lentiviral Particles with a Titer of >1x10e7 IU/mL. (sgRNA and Cas9 in a single vector)                                                                    |
| Vector Backbone:      | pLenti-U6-sgRNA-SFFV-Cas9-2A-Puro                                                                                                                                                          |
| Promoter:             | U6 Promoter, SFFV Promoter                                                                                                                                                                 |
| Selectable Marker:    | Puromycin                                                                                                                                                                                  |
| Bacterial Resistance: | Ampicillin                                                                                                                                                                                 |
| Expression Type:      | Stable, Transient                                                                                                                                                                          |
| Sequence:             | Sequence available upon placing order                                                                                                                                                      |
| Specificity:          | GRNAs are designed for use with Cas9 Nuclease only.  Cas9 Nuclease is under the control of the SFFV promoter which should work for a vast majority of cells, except ES cells or iPS cells. |
| Sequencing Primer:    | U6 Forward Primer: 5'TACGTCCAAGGTCGGGCAGGAAGA-3'                                                                                                                                           |
| Components:           | Lentiviral particles with an individual gRNA (300 μL) for a specific sequence of Lyz2                                                                                                      |

## Target Details Gene: LYZ2 Alternative Name: Lyz2 (LYZ2 Products) NCBI Accession: NML017372 Application Details Application Notes: Recommended for quality control: Restriction Enzyme Digest and Sequencing Restrictions: For Research Use only Handling Format: Viral Particles

## Storage: -80 °C Expiry Date: 12 months
