## Target Details

Gene:	ZNF197
Abstract:	ZNF197 Products
Background:	This gene product belongs to the zinc finger protein superfamily, members of which are
	regulatory proteins characterized by nucleic acid-binding zinc finger domains. The encoded
	protein contains 20 tandemly arrayed C2H2-type zinc fingers, a Kruppel-associated box (KRAB)
	domain, and a SCAN box. This transcript turns over rapidly and contains 3' UTR AUUUA motifs,
	which are often a hallmark of rapid turnover. It is overexpressed in some thyroid papillary
	carcinomas. This gene is located in a cluster of zinc finger genes at 3p21. Two alternatively
	spliced transcripts encoding different isoforms have been described.
