Target Details

Gene:	Vitamin D-Binding Protein (GC)
Alternative Name:	group-specific component (vitamin D binding protein) (GC) (GC Products)
Background:	<p>The protein encoded by this gene belongs to the albumin gene family. It is a multifunctional protein found in plasma, ascitic fluid, cerebrospinal fluid and on the surface of many cell types. It binds to vitamin D and its plasma metabolites and transports them to target tissues. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.</p>
