Target Details

| | |
|-------------------|---|
| Gene: | Vitamin D-Binding Protein (GC) |
| Alternative Name: | group-specific component (vitamin D binding protein) (GC) (GC Products) |
| Background: | <p>The protein encoded by this gene belongs to the albumin gene family. It is a multifunctional protein found in plasma, ascitic fluid, cerebrospinal fluid and on the surface of many cell types. It binds to vitamin D and its plasma metabolites and transports them to target tissues. Alternatively spliced transcript variants encoding different isoforms have been found for this gene.</p> |
