## Human OR9G4 ORF Clone in Mammalian Expression Vector (Myc-DYKDDDDK Tag)

| Overview              |  |
|-----------------------|--|
| Quantity:             | 10 μg  |
| Gene:                 | OR9G4  |
| Species:              | Human  |
| Fusion tag:           | Myc-DYKDDDDK Tag   |
| Insert:               | ORF  |
| Vector:               | Mammalian Expression Vector  |
| Application:          | Protein Expression (PExp)  |
| Product Details       |  |
| Purpose:              | Mammalian Vector with ORF clone of Human olfactory receptor, family 9, subfamily G, member 4 (OR9G4) |
| Brand:                | TrueORF  |
| Insert Length:        | 984 bp   |
| Vector Backbone:      | pCMV6-Entry  |
| Promoter:             | CMV Promoter   |
| Bacterial Resistance: | Kanamycin  |
| Expression Type:      | Transient  |
| Specificity:          | Restriction Site: Sgfl-Mlul  |
| Sequencing Primer:    | VP1.5 (forward) 5'GGACTTTCCAAAATGTCG 3', XL39 (reverse) 5'ATTAGGACAAGGCTGGTGGG 3'                    |
| Grade:                | End-sequenced  |
| Components:           | The ORF clone is ion-exchange column purified, transfection-ready dried plasmid DNA, and             |

shipped with 2 vector sequencing primers.

## Target Details

| Gene:               | OR9G4  |
|---------------------|--|
| Abstract:           | OR9G4 Products   |
| Background:         | Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response |
|                     | that triggers the perception of a smell. The olfactory receptor proteins are members of a large  |
|                     | family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory    |
|                     | receptors share a 7-transmembrane domain structure with many neurotransmitter and                |
|                     | hormone receptors and are responsible for the recognition and G protein-mediated                 |
|                     | transduction of odorant signals. The olfactory receptor gene family is the largest in the        |
|                     | genome. The nomenclature assigned to the olfactory receptor genes and proteins for this          |
|                     | organism is independent of other organisms.  |
| NCBI Accession:     | NM_001005284, NP_001005284   |
| Application Details |  |
| Restrictions:       | For Research Use only  |
| Handling            |  |
| Format:             | Lyophilized  |
| Storage:            | 4 °C/-20 °C  |
