Target Details

Gene:	TEP1
Abstract:	TEP1 Products
Background:	This gene product is a component of the ribonucleoprotein complex responsible for telomerase activity which catalyzes the addition of new telomeres on the chromosome ends. The telomerase-associated proteins are conserved from ciliates to humans. Alternative splicing results in multiple transcript variants.
NCBI Accession:	NM_007110 , NP_009041
