Mouse CFL2 ORF Clone in Cloning Vector

Overview

|              |                  |
|--------------|------------------|
| Quantity:    | 1 µg             |
| Gene:        | Cofilin 2 (CFL2) |
| Species:     | Mouse            |
| Insert:      | ORF              |
| Vector:      | Cloning Vector   |
| Application: | Cloning (Clon)   |

Product Details

|                       |                                                                          |
|-----------------------|--------------------------------------------------------------------------|
| Purpose:              | ORF Cloning-Vector holds the gene between an AflII and EcoRV cut site.   |
| Insert Length:        | 501 bp                                                                   |
| Vector Backbone:      | pORF                                                                     |
| Bacterial Resistance: | Spectinomycin                                                            |
| Expression Type:      | Transient                                                                |
| Sequencing Primer:    | M13 FP: 5'-CCCAGTCACGACGTTGTAAAACG-3'<br>M13 RP: 5'-CAGGAAACAGCTATGAC-3' |

Target Details

|                   |                      |
|-------------------|----------------------|
| Gene:             | Cofilin 2 (CFL2)     |
| Alternative Name: | Cfl2 (CFL2 Products) |
| NCBI Accession:   | NM_007688            |

Application Details

|                    |                                                                    |
|--------------------|--------------------------------------------------------------------|
| Application Notes: | Optimal working dilution should be determined by the investigator. |
|--------------------|--------------------------------------------------------------------|

Application Details

Restrictions: For Research Use only

Handling

Format: Liquid

Buffer: 10 mM Tris-HCl, 1 mM EDTA, pH 8.0

Storage: -20 °C

Storage Comment: 1 year when stored at -20°C or lower in a non-frost free freezer.
